

## Technical Information

### MJ- PVA (Wood Adhesive)

MJ PVA is ready to use as Aqueous Poly Vinyl Acetate based homopolymer dispersant. It is used for Bonding wood, plywood, laminates, Veneers, particle boards, black board / hard board etc. It is ideal for wood application and wood working.

#### Chemical Properties:

Physical Appearance:	Milky White Viscous liquid
Solid contents:	34 %
pH:	5.5
Viscosity:	40000 to 50000 cps on Brookfield viscometer LVT Model – 4 Spindle No. 6 RPM
Film Appearance:	Clear

#### Suggested Applications:

MJ – SH is an Adhesive with good bond strength, wet tack and workability for wood lamination, wood jointing, labeling, art work, pencil manufacture, sports good manufacture and misc. adhesive applications. It gives excellent bond in wood and furniture industries. The bonding strength is unsurpassed. It also gives higher coverage and also resistance to water.
